The application of FAE Rock Crushers on ski slopes

What is a FAE Rock Crusher?

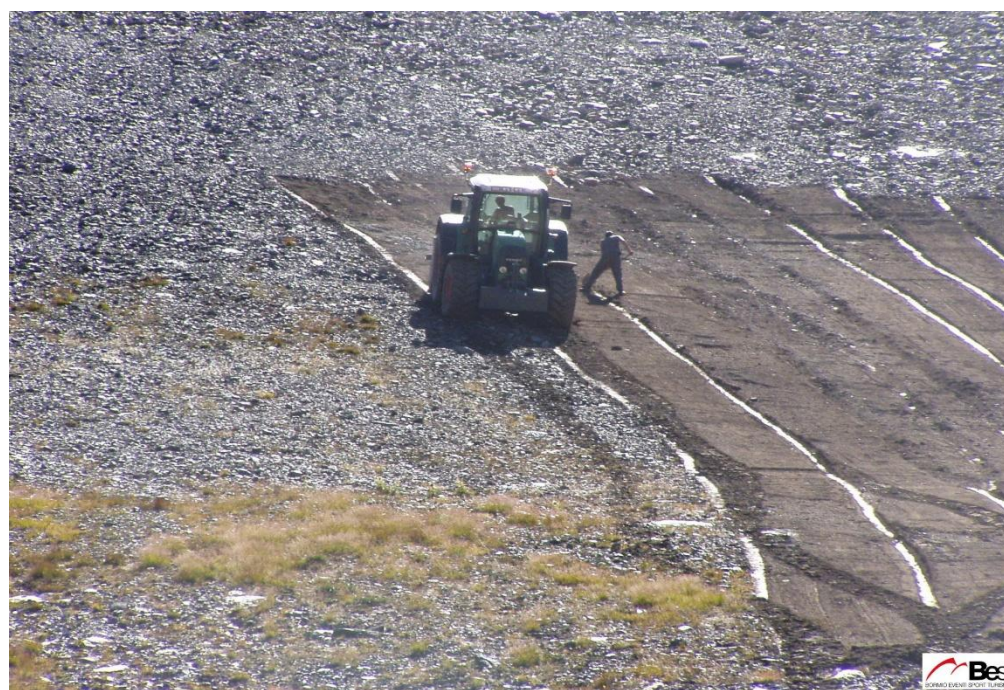

The FAE rock crusher is a mobile machine that needs to be combined with an agricultural type tractor to be able to operate.

What can I do with the FAE Rock Crusher?

It is ideal for the creation, restoration and maintenance of ski slopes and access dirt roads.

Advantages of the use of FAE Rock Crushers on ski slopes:

- complete elimination of rocks
- even surface, the new generated soil is ideal for grass seeding
- less request of water for snow generation

- better environmental impact during the Summer; as the green slope can be used as pasture land
- less erosion on the slope
- increased safety due to rock free slope no need to shape the slopes with expensive earth moving machinery

Available models:

STC/R-175 | ideal combined with 140 up to 180 HP tractors, working width of 170 cm, 68 inches

STC/R-200 | ideal combined with 160 up to 180 HP tractors, working width of 195 cm, 77 inches

STCH/R-200 | ideal combined with 180 up to 280 HP tractors, working width of 200 cm, 79 inches

STCH/R-225 | ideal combined with 200 up to 280 HP tractors, working width of 225 cm, 88 inches

STCH/R-250 | ideal combined with 220 up to 280 HP tractors, working width of 250 cm, 98 inches
